Date: 01.08.13 to 31.01.14
Project: CEO Automotive (Detroit)
V. in €: 680 mio. Euro / 520 employees
Order: Optimization and control of production

Reorganization and restructuring of the entire work (purchasing, marketing and production processes) Resolution of the subsidiary in Berlin and implementation (production) in Detroit. The task required a hands-on manager who was also ready themselves to lend a hand and show the staff just in the individual production processes themselves, and also to explain. Specializing in manufacturing was the better utilization of the point- and welding applications. It always came back to quality problems and excessive times in the processes. overall responsibility and incorporation of the new CEO.

Date: 01.02.13 to 31.07.13
Project: CEO Water treatment (Dubai)
V. in €: 42 mio. Euro / 240 employees
Order: Implementation and planning incl. HSE

Support of the GM, head of total negotiation of the contract project. Coordination of the entire site and the HR in compliance with the legislation under state law. Monitoring and logging of the welding process. Training and instruction of employees at the site. Logging and meetings with the project management, Appointment setting and monitoring of all individual construction phases.

aabar

Date: 01.04.11 to 31.12.12
Position: Director Procurement
V. in €: Power Plant (Dubai / Canada / Berlin) 128 mio. Euro / 70 employees
Order: Staff training to build the recooling systems and optimizing production
Offshore training and HSE

Optimization for the procurement of individual components. This re-cooling systems are meant that are required for the generation of electricity from wind turbines. The recooling systems are connected in front of the converters and cool them simultaneously. Here I have built the installations together with 3 employees and removed together with the customer, Siemens. These components are used in the offshore wind farms (Baltic I and BalticII) in the Baltic Sea. Currently I support the company in Berlin on projects in Dubai, Canada and Baltic II Since I can bring my entire technical know-how as a hands-on mentality here.

Date: 01.10.10 to 30.03.11
Project: CEO Gas treatment (Dubai / Qatar)
V. in €: 236 mio. Dollar / 45 employees
Order: Start-up and build a new society and HSE

Building a new society for the construction of new gas pipelines in the Arab countries. This includes a construction of a new production cities in the Freeland area.

Date: 01.02.10 to 30.09.10
Position: Project management, HSE
V. in €: Oil treatment (Oilsands Alberta, Canada) 28 mio. Dollar / 135 employees

Reappraisal of the HSE regulations and their implementation in the onshore and offshore area. Implementation of the latest software and training-staff. Monitoring of individual production sectors Also you can see from my resume, I belong to a small group of top managers, yet in all areas of production itself can lend a hand today and can convey this knowledge to the employees in production also. I can put the theory and practice in all areas of modern business management successfully over each other. My projects I have all completed successfully and I'll show my co- workers also like that I'm well able to still x-ray proof tubes to weld. This creates just in the production of the employees enter the appropriate expertise. I am a absolut Hands on Manager.
